

HOW TO BREW THE PERFECT POT OF COFFEE

FOLLOW THESE FEW SIMPLE GUIDELINES FOR PERFECT RESULTS EVERY TIME!

**ALWAYS START WITH FRESH, COLD WATER, A NEW FILTER PAPER
AND A NEW (FULL) PACKET OF COFFEE**

1. Switch on the machine – in less than 5 minutes your perfect pot of coffee will be ready!
2. Slide the thermos jug onto the base of the machine - use the little 'stoppers' to check it's in the correct place (coffee brews through the pipe).
3. Put a new filter paper into the hopper. Make sure the filter paper fits snugly around the edge of the hopper.
4. Take one packet of coffee and empty it all into the hopper. Slide the hopper back into the machine.
5. Pour a flask of cold water into the reservoir at the back of the machine.
6. When the coffee is ready, don't forget to:
 - a. Put the lid firmly on the flask so the coffee stays hot.
 - b. Throw away the filter paper and old coffee grounds from the hopper.

**IF THE RED 'DE-SCALE' LIGHT COMES ON PLEASE
CALL US IMMEDIATELY TO ARRANGE FOR A DE-SCALE KIT TO BE SENT TO YOU.
THIS IS IMPORTANT TO AVOID CAUSING PERMANENT DAMAGE TO THE MACHINE.**

To clean the machine, simply wipe it over with a damp cloth.

To clean thermos jugs and hopper, rinse with hot water and wipe dry or stand upside down to drain.

Please do NOT put them in dishwashers.
